

THEO, FROM SPAIN TO CZECH REPUBLIC

It's been a few years searching a proper volunteering project. I've been applying to many of them. Some of which never answered, and others did answer but it was such a bad moment for me. I guess it's difficult to find the perfect timing. But I finally made it guys!

“Never stop dreaming, because the world is only for dreamers”. I was just 12 years old when my teacher told me that quote. Back then my world was school, classmates and family. The world got bigger since then, that's for sure. Now that I'm 23 years old, in this precisely moment I can't but remember this teacher because I made a dream — one that I've started dreaming long time ago — become true. This teacher never told to be a scientist, a teacher, or anything. She just let me know that my dreams and goals matter.

It wouldn't be fair to describe myself without mention the people that I've been surrounded by. Specially those whose perspective changed the way I see the world now. The more people I listened actively, the more I know myself and the better I define the person who I want to be.

I did join this adventure — with this specific team — because I want to work accordingly to their purpose. From the first time we come to this world we spend our time struggling and trying to figure out where are we. I do think that there is no age such as “square one” to start thinking about oneself purpose. In order to know ourselves better is a must to be opened to changes, fails and to observe other people's perspective. That's how we improve both as individuals and as a community.

But you know what? Maybe I am wrong, and that is why I am here: to explore, to learn, to help and to teach as much as I can. No expectation at all, just a curious mind's journey.

Big, big, big thank you to Hnizdo organization and the ESC community for this opportunity.

Už jsem na cestě!
